ABOUT ME

I'm a Python Backend Developer and Frontend Developer with experience in Python (Flask) and Laravel, and I use Vue.js to build modern interfaces. I focus on creating scalable microservices, RESTful APIs, and automating processes using Python scripts. I work with Docker to deploy applications efficiently and build optimized solutions for production environments. I'm always eager to learn new technologies and easily adapt to different work environments.

PROFESSIONAL EXPERIENCE

Database administrator
July 2022 - November 2022

CityLab

I worked with SQL Server, developing strong skills in database management and query optimization. I focused on improving the performance of slow-running queries by analyzing execution plans and applying indexing strategies, as well as efficiently handling large datasets to support daily operations.

Frontend Developer and Analyst Freelance
April 2024 - December 2024

ITCA - FEPADE

Developer of generative AI tools for students and researchers, as part of the ITCA-FEPADE Innovation 2024 project. My contribution focused on front-end development, as well as providing ideas and approaches from an analyst's perspective, solving technical and functional problems to improve the user experience and tool efficiency.

- Front-end development for generative AI tools
- Contribution of analytical ideas and problem-solving approaches
- Focus on enhancing user experience and tool efficiency

Backend and Frontend Developer
June 2024 - Present

Clobi Technologies

I developed and maintained web applications for various clients, optimizing internal processes. Some of my notable responsibilities in the position included:

- Microservices Development with Flask
- Web Applications with Vue.js and Laravel
- Process Automation
- Deployments with Docker
- Design of Efficient and Normalized Relational Database Schemas
- Quality Assurance Testing
- Prototyping applications in Figma to collaborate on system design and extract visual assets and specifications for development.
- Agile Methodologies (Scrum, Kanban)

SKILLS

- Python
- Docker
- Git - GitHub.
- Tailwind CSS
- Vue.JS.
- Monolithic and Hybrid Architecture.
- Laravel
- Linux
- HTML / CSS
- Scripting
- Figma
- SQL

LANGUAGES

- Español (Native)
- Ingles (A2)

EDUCATION

Software Development Engineering Technician

ITCA Fepade | Escuela Especializada en Ingeniería (2023-2024)

Software Development Technician

Instituto Nacional Técnico Industrial (2020 - 2022)

CERTIFICATION

NDG Linux
Cisco Networking Academy (2022)

CCNAv7: Introduction to Networks.
ITCA FEPADE (2023)
